

## Organizing European Resilience.

### A European Defence Ecosystem That Delivers

#### The Opportunity

BASED is building Europe's leading platform at the intersection of defence, geopolitics, innovation, and capital. It connects military, policymakers, and demand-side actors with industry, investors, and technology leaders.

Through close collaboration across Europe as well as Israel and the Middle East, BASED accelerates innovation, improves capital allocation, and enables real-world deployment of defence and resilience capabilities.

The ambition is to build Europe's powerhouse for resilience with purpose and a category-defining, high-value platform asset.

#### The Platform

Resilience House is already an active, highly curated community of startups, investors, industry leaders, and policymakers, built around a focused offering of intelligence including newsletters, briefings, and reports, flagship formats such as the Munich Security Breakfast, curated events, roundtables and private dinners, as well as targeted matchmaking and scaling programs with investors and industry.

**This foundation enables scalable revenue streams across memberships, media, events, programs and, investment vehicles.**

#### Investment Opportunity

**BASED is raising €1 million for 10% equity.**

This is a rare opportunity to invest early in the public commissioned, privately organized de:hub Security and Defence with the potential to build a trophy asset at the center of Europe's defence and resilience ecosystem.

We believe this represents one of the most compelling strategic investment opportunities in Europe today.

Target closing 30 April 2026

## Investor Benefits

- Advisory Board participation
- Access to platform programs
- Preferred access to events and roundtables
- Priority access to curated deal flow

## Governance

BASED is structured as a German GmbH, majority owned by management and backed by investors including Lakestar. Governance safeguards ensure full independence of editorial and content decisions from shareholders.

The company is led by Lippold von Oldershausen, supported by an Executive Board and an Advisory Board including Dr. Klaus Hommels and General Sir Chris Deverell.
